Subject: Transmit Frequency Range: VK6-IRU600V3

To Whom It May Concern,

The product label for VK6-IRU600V3 states a frequency range of 5725 – 6450MHz. These ranges represent the full range of the RF components within this radio. The radio can either be configured for use with 5.8GHz spot tuned filters or L6GHz spot tuned frequencies. All of the 5.8GHz filters are within the 15.407 transmit range of 5725MHz – 5850MHz and ensure compliance with the band edge. All of the L6GHz filters are within the licenced band. Software controls are also in place to ensure that this product can only transmit within the licenced L6GHz band or within the authorised range of the licence-exempt 5.8GHz band.

Therefore, it would not be accurate to label these radios only with the range stated on our application.

Sincerely,

A handwritten signature in black ink that reads 'R. French'.
